

Who Should Attend

The Process Plant Start-up Seminar was designed for:

- project managers,
- production managers,
- engineers,
- supervisors,
- team leaders,
- training managers,
- operating & craft personnel

who are planning and implementing the start-up of ANY type of plant.

Planning the many diverse steps necessary for a successful start-up requires knowledge, commitment, and effective use of resources.

Poor execution can delay a project for months and increase total cost. Millions in anticipated earnings can be lost in a poor start-up.

Knowing what to do, when to do it, and how to do it is critical in completing a project on time and at or below budget.

The proven methods taught in the Process Plant Start-Up Seminar can help a team plan for the expected and unexpected thus ensuring start-up success.

Participants in the Process Plant Start-Up Seminar will learn how to improve manpower efficiency, scheduling, precommissioning, commissioning, start-up activities, and much more!
